

A laptop is shown from a low angle, with its screen open. The pages of the laptop are replaced by a glowing, golden-yellow book that appears to be radiating light. From the top of the laptop, a large, flowing trail of white and silver particles, resembling a comet or a stream of data, extends across the top of the frame. The background is dark, making the glowing elements stand out. The overall aesthetic is futuristic and digital.

# Moodle Platform

An Introduction

# The purpose of Moodle

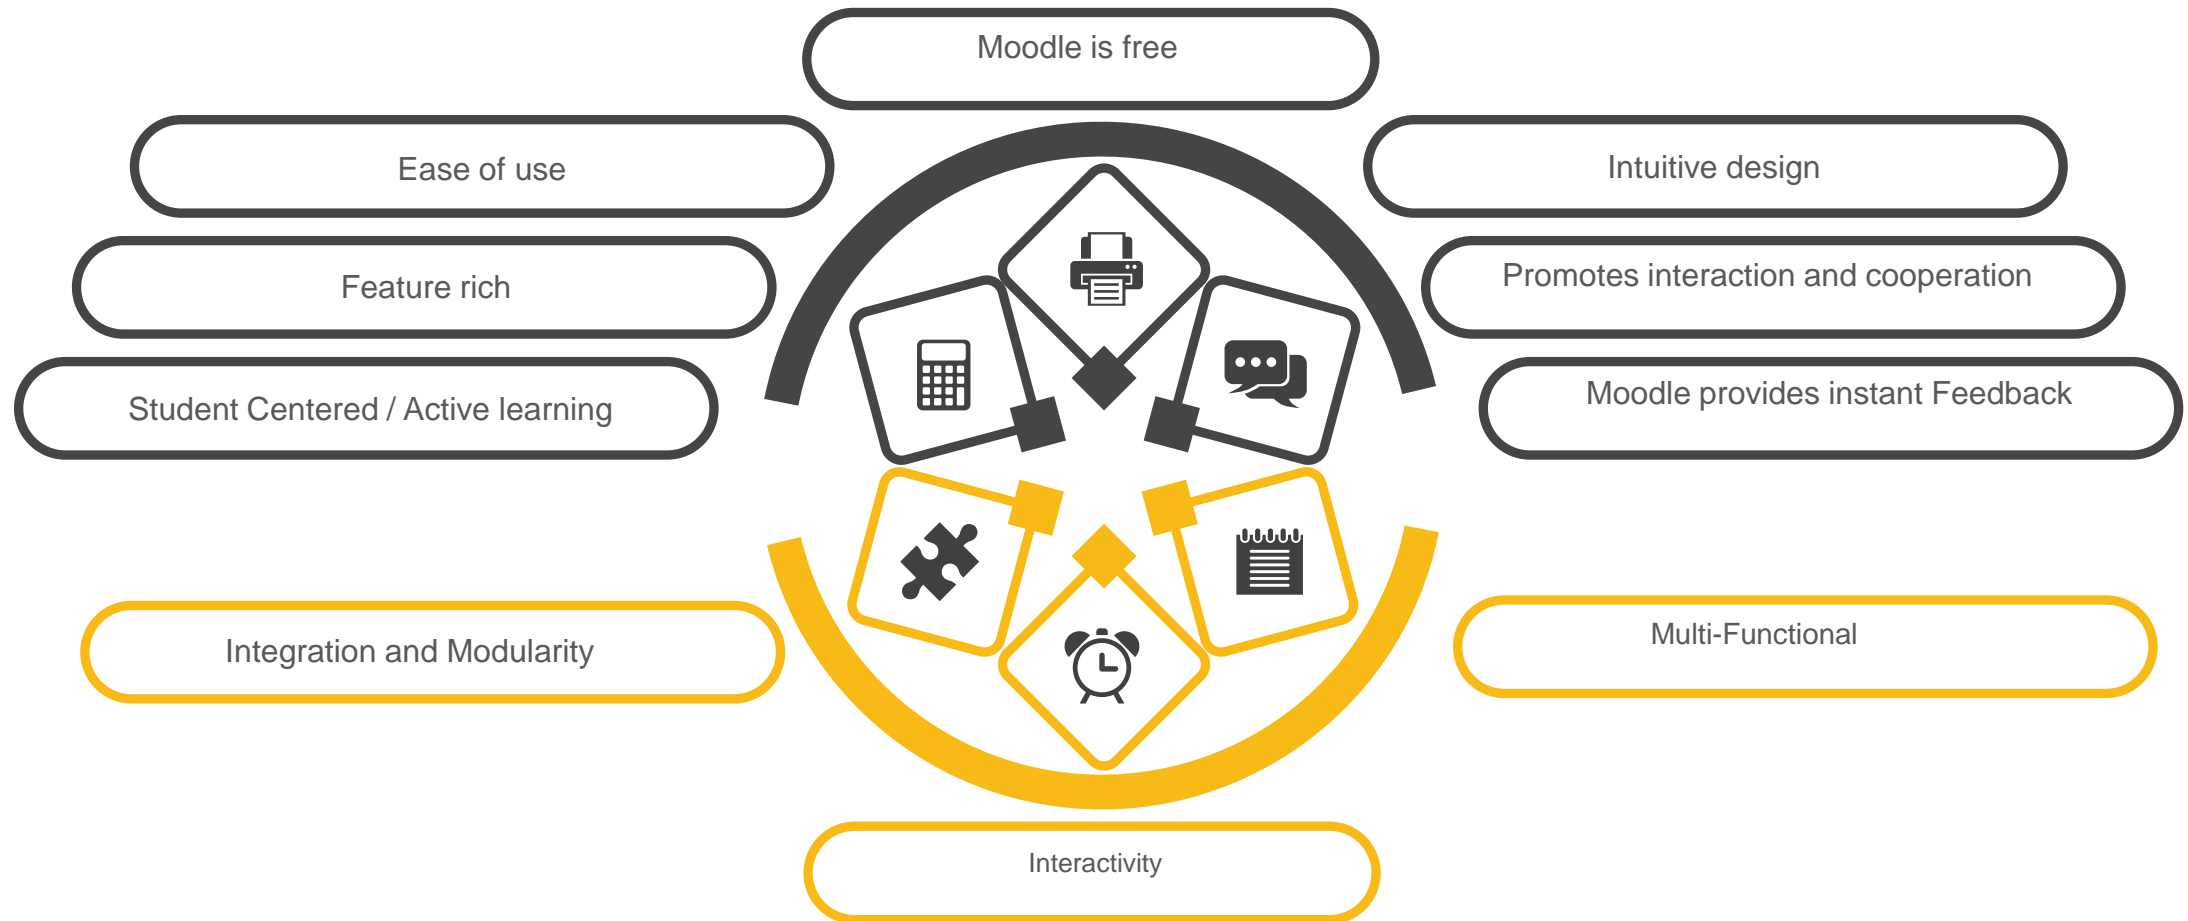

Moodle is a free and open-source learning management system (LMS). Moodle was developed on pedagogical principles, it is used for blended learning, distance education, flipped classroom and other e-learning projects in schools, universities, workplaces and other sectors. With customizable management features, it is used to create private websites with online courses for educators and trainers to achieve learning goals. Moodle allows for extending and tailoring learning environments using community-sourced plugins.

# Moodle Compatibility

Moodle is available on desktop and mobile devices

# Exploring Moodle

---

Teacher Perspective

- In Moodle, a teacher has responsibility for the materials in their own course
- Manage enrolments
- Change the layout of the course page
